DETAILED ACTION

1. This Office Action is in response to Amendments and Remarks received 28 November 2005. Per Applicant's request, claim 6 has been canceled. Claims 1-5 are pending

Specification

2. The title will be changed to "Program Development compressed Trace Support Apparatus" to more clearly identify the invention.

Allowable Subject Matter

3. Claims 1-5 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

As Applicant has pointed out, on page 6 of Remarks received 6/24/2005, regarding independent claim 1, cited prior arts taken alone or in combination, fail to disclose:

“outputting an uncompressed instruction address as trace data when an instruction code of the instruction address/instruction code data from said CPU is a branch instruction;

outputting the uncompressed instruction address as the trace data when the section trace start signal from said event management means is active;

generating a plurality of compressed instruction addressed by compressing the instruction address of the instruction address/instruction code data, combining the compressed instruction addresses, and outputting the compressed instruction addresses as the trace data when the instruction address of the instruction address/instruction code data is not a branch instruction and the section trace start signal is not active”

It is important to note that the 'section trace start signal from said event management means is active' only during a brief 2-clock period at the start of execution of a section to be traced, as disclosed in the Specification, page 19, last paragraph.

Thus, claims dependent upon claim 1, claims 2-5, also contain allowable subject matter.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
